

MARRIAGE IS A HUMAN RIGHT
NOT A HETEROSEXUAL PRIVILEGE

Teacher's claim: *Every couple (straight or gay) has the same rights and responsibilities.*

As long as you are **happy** does it matter who you fall in love with?

Pros

Cons

1) All humans are equal so why can't we love another person who of the same sex? We accept the marriage of people of different colour, religion or nationality so we should also accept same-sex marriages. Let's not discriminate!

1) In my opinion gay or lesbian couples shouldn't have children because if they adopted one, the kid could have problems to integrate with his friends or schoolmates. In fact having two mothers or two fathers - I'm sure - can bring about problems. Besides, a child can be teased by their classmates or friends and this fact isn't good for their life.

2) A lot of different films, books and newspapers talk about gay couples, so we have to follow the progress of society because now everyone has freedom of thought.

2) Gay or lesbian couples shouldn't be allowed to get married or have a baby, because they are not a real couple. In the *Holy Bible* the symbol of the couple are Adam and Eve, a man and a woman, because they can have a child together. On the contrary, a homosexual couple can't procreate so they can't be considered a family.

MARRIAGE IS ABOUT LOVE NOT GENDER

3) Some people think that homosexual couples shouldn't adopt children. But there are a lot of studies about these problems which prove the contrary. For example, "The American Academy of Paediatrics" in 2006 said that children who grow up in that kind of family don't have any particular problems.

3) Renting a uterus is immoral. It's immoral because at their birth, the child will be adopted by the gay couple and they will not see their mother anymore. One day, when they grow up, they will want to know who their mother is, maybe they will find her, but probably she won't recognize them.
